COEUS BI

The window into your Analytics

Request Demo

OVERVIEW

Coeus simplifies and speeds up the presentation and delivery of analytics into your internal and external users. Through leveraging the investment in Qlik, Coeus is able to surface your analytics in a guided, easy to use configurable web portal without the need for complex custom development.

Create and curate bespoke experiences in a matter of minutes. Coeus is able to do this through simplifying the administration and adding a layer in front of your Qlik window. This enables you to simplify the experience of creating new pages, dashboards and users of administrating your portal.

Dynamic Content Creation

Your portal updates automatically and can be changed on the fly.

Flexible Configuration

Control the personlised feel of your portal easily with a simple graphical interface.

Out-of-the-box Portal

Up running and giving value in days, not months - with no web skills required.

Governance & Security

Precanned and pen-tested security rules take away stress over security.

Responsive & Mobile

Remove worries about developing for different devices, Coeus BI portals are all mobile friendly.

Easy User Management

Add and manage individual privilege-based user-access with ease

Case Study - Wickes Retail

Fantastic supplier relationships and engagement through analytics

Sam Green, System Manager for the Supplier Portal at Wickes (part of Travis Perkins plc) used Coeus BI to enable suppliers to achieve **137% sales uplift** week on week, prevent problems such as low stock and track performance by region.
