

# Introducing Catalyst AI Cloud

Accelerate the Impact of AI on  
Your Business

## Business Challenge

AI is undeniably mission critical. It is a generation-defining technology with the potential to reshape every industry, every business service, and every customer interaction. The connection between data science and business impact can be unclear, and operations remain dangerously immature. Catalyst's AI Cloud platform is designed for today's challenges and opportunities facing organisations. It turns the possibilities of AI into tangible realities.

## Our Solution

Catalyst AI Cloud is an end-to-end managed service allowing your company to accelerate or start your use of AI, unlocking value from your data. Catalyst defines, integrates and builds machine learning models and solutions for your company's specific scenarios.

Paired with seamless data integration, Catalyst AI Cloud brings speed, realisation and scale to your organisation's AI projects.

- Seamless Data Integration
- 24h monitoring
- Unified, end-to-end platform across the AI lifecycle
- Clear and trusted business outcomes
- Deployed and operated at scale on any cloud, in the data centre, and at the edge
- Seamless integration with value monitoring to support DevOps teams who are unfamiliar with MLOps

## Why Catalyst

We challenge organisations to unlock insights, drive performance and create value by bringing people and data together. Accelerate your business performance with best-of-breed data management, data analytics and data science practices, resulting in improved operational effectiveness, and exceptional data-driven decision making.

## Benefits

- Accelerates delivery of AI to production
